

Joint Coordinating Group of Experts: second meeting

The Joint Coordinating Group of Experts (JCGE) will meet for the second time from 9 to 11 September 2019 in Berne. This ad hoc working group has a dual objective:

- To ensure consistent development of the legislation in the Regulation concerning the International Carriage of Goods by Rail (RID) and in general railway law
- To avoid any contradictions between the provisions for vehicles and those for transport operations involving the carriage of dangerous goods by rail.

At this second meeting, the JCGE will give its view on the final adoption of its Rules of Procedure. Secondly, it will review and update the list of priority actions adopted at the first meeting of the JCGE in February 2019.

Following its meetings and once solutions to reconcile RID and general railway law have been framed, the task of the JCGE will mainly be to submit opinions to the OTIF organs concerned and to the European Union's DG Mobility and Transport.
