OTIF/RID/CE/GTP/2013/9

22 August 2013

Original: English/Russian

RID: 2nd Session of the RID Committee of Experts' standing working group
(Copenhagen, 18 – 22 November 2013)

Subject: Harmonisation of RID and Annex 2 to SMGS – Synoptic table of differences
between SMGS Annex 2 and RID

Transmitted by the Committee of the Organisation for the Cooperation of Railways (OSJD)

1. Based on document OTIF/RID/CE/GTP/2012/9 submitted by the Committee of the Organisation for the Cooperation of Railways, work on harmonising RID and SMGS Annex 2 was started at the 1st session of the RID Committee of Experts' standing working group (Riga, 12 – 15 November 2012). This document contained a synoptic table which, on the basis of the 2011 editions of the regulations, compared all the rules in SMGS Annex 2 and RID which differ.
2. The initial results of this work are set out in paragraphs 39 to 92 of report OTIF/RID/CE/GTP/2012-A.
3. For the meeting of the temporary OSJD working group on SMGS Annex 2, "Provisions for the carriage of dangerous goods" (Warsaw, 17 – 21 June 2013), to which representatives of the RID Contracting States were also invited, the representative of Latvia submitted this revised version of document OTIF/RID/CE/GTP/2012/9. This revised version takes account of all the amendments made to the 2013 edition of SMGS Annex 2.
4. The results of this meeting of the temporary OSJD working group can be found in document OTIF/RID/CE/GTP/2013/3.
5. Column 2 of the following table contains the text of SMGS Annex 2 and column 3 contains the corresponding RID text. In column 4 (nature of differences and need to introduce changes to SMGS Annex 2) the SMGS working group examines each of the differences. Column 5 (Note (comments on differences)) also contains explanations on the differences that have been found.
6. The note included in various places in column 4 ("will be considered additionally") means that the issue should be discussed again. The comment "no changes required" in this column means that at the moment, no amendments are planned by OSJD.

For reasons of cost, only a limited number of copies of this document have been made. Delegates are asked to bring their own copies of documents to meetings. OTIF only has a small number of copies available.

List of differences in kind between Appendix 2 to SMGS and RID, version 2013

Paragraph	Text of Annex 2 to SMGS	Text of RID (English)	Nature of differences and need to introduce changes to Annex 2 to SMGS (SMGS Working Group's position)	Note (comments on differences)
1.1.2.2	(reserved)	For the international carriage of dangerous goods in trains other than freight trains in accordance with Article 5 § 1 a) of Appendix C, the provisions of Chapter 7.6 shall apply.	<i>Differences in kind. No changes required.</i>	<i>Carriage of dangerous goods in passenger trains is regulated by SMPS (Agreement on International Passenger Railway Traffic). Under this Agreement carriage of such goods is prohibited.</i>
1.1.2.3	For the international carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles, only the provisions of 1.1.3.8 in conjunction with Chapter 7.7 shall apply.	For the international carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles in accordance with Article 5 § 1 b) of Appendix C, only the provisions of 1.1.3.8 in conjunction with Chapter 7.7 shall apply.	<i>Differences in kind. If a link is included in SMPS, differences will be eliminated from 1 July 2013.</i>	<i>Carriage of dangerous goods in passenger trains is regulated by SMPS. Under this Agreement carriage of such goods is prohibited.</i>
1.1.3.1	a) (reserved)	(a) the carriage of dangerous goods by private individuals where the goods in question are packaged for retail sale and are intended for their personal or domestic use or for their leisure or sporting activities, provided that measures have been taken to prevent any leakage of contents in normal conditions of carriage. When these goods are flammable liquids carried in refillable receptacles filled by, or for, a private individual, the total quantity shall not exceed 60 litres per receptacle. Dangerous goods in IBCs, large packagings or	<i>Differences in kind. Latvia has prepared a proposal for discussion at the OSJD meeting.</i>	<i>Carriage of dangerous goods in passenger trains is regulated by SMPS. Under this Agreement carriage of such goods is prohibited.</i>

		tanks are not considered to be packaged for retail sale;		
1.1.3.1	c) (reserved)	(c) the carriage undertaken by enterprises which is ancillary to their main activity, such as deliveries to or returns from building or civil engineering sites, or in relation to surveying, repairs and maintenance, in quantities of not more than 450 litres per packaging and within the maximum quantities specified in 1.1.3.6. Measures shall be taken to prevent any leakage of contents in normal conditions of carriage. These exemptions do not apply to Class 7. Carriage undertaken by such enterprises for their supply or external or internal distribution does not fall within the scope of this exemption;	<i>Difference in kind. Will be considered additionally. Consider additionally expedience of including subparagraph (c). Latvia has prepared a proposal for discussion at the OSJD meeting.</i>	<i>Annex 2 to SMGS does not regulate carriage undertaken by enterprises which is ancillary to their main activity.</i>
1.1.3.6	Quantity of packaged goods per wagon or large container subject to certain requirements and exemptions of Appendix 2 to SMGS. <i>Note 1: This paragraph shall apply only in cases when it is referred to in other Chapters of Annex 2 to SMGS (for example, Chapters 1.8 and 1.10)</i> <i>Note 2: Transport category is a category assigned to certain goods based on degree of danger.</i>	Total maximum permissible quantity per wagon or large container	<i>Differences in kind. Consider additionally. Consider possibility of correcting paragraph 1.1.3.6 (Total maximum permissible quantity per wagon or large container) Latvia has prepared a proposal for discussion at the OSJD meeting.</i>	<i>Annex 2 to SMGS does not regulate carriage undertaken by enterprises which is ancillary to their main activity.</i>
1.1.3.8	Application of exemptions in carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles. For the carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles, the exemptions in accordance with 1.1.3.1 (a)	Application of exemptions in carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles For the carriage of dangerous goods as hand luggage, registered luggage or in or on board vehicles, the exemptions in accordance with 1.1.3.1 (a)	<i>Differences in kind. If a link is included in SMPS, differences will be eliminated from</i>	<i>Carriage of dangerous goods in passenger trains is regulated by SMPS. Under this Agreement carriage of such goods is prohibited.</i>

	to (e), 1.1.3.2 (b), (d) to (h), 1.1.3.3, 1.1.3.4.1, 1.1.3.5 and 1.1.3.7 (b), as set out in Chapter 7.7, shall apply.	to (e), 1.1.3.2 (b), (d) to (h), 1.1.3.3, 1.1.3.4.1, 1.1.3.5 and 1.1.3.7 (b), as set out in Chapter 7.7, shall apply.	1 July 2013.	
1.3.1	<p>Scope and applicability</p> <p>Persons employed in connection with the carriage of dangerous goods shall be trained in the requirements governing the carriage of such goods appropriate to their responsibilities and duties. Employees shall be trained in accordance with 1.3.2 before assuming responsibilities and shall only perform functions for which required training has not yet been provided, under the direct supervision of a trained person. Specific training requirements in Chapter 1.10 shall also be addressed.</p> <p><i>Note 1: In all cases, the training of employees participating in carriage shall be performed in accordance with the requirements of domestic law and regulations.</i></p> <p><i>Note 2: With regard to the training for the safety adviser, see 1.8.3 instead of this section.</i></p> <p><i>Note 3 For training with regard to Class 7, see also 1.7.2.5.</i></p> <p><i>Note 4: The training shall be carried out before taking on responsibilities and duties concerning the carriage of dangerous goods.</i></p>	<p>Scope and applicability</p> <p>Persons employed by the participants referred to in Chapter 1.4, whose duties concern the carriage of dangerous goods, shall be trained in the requirements governing the carriage of such goods appropriate to their responsibilities and duties. Employees shall be trained in accordance with 1.3.2 before assuming responsibilities and shall only perform functions, for which required training has not yet been provided, under the direct supervision of a trained person. Training requirements specific to security of dangerous goods in Chapter 1.10 shall also be addressed.</p> <p>NOTE 1: With regard to the training for the safety adviser, see 1.8.3 instead of this section.</p> <p>2: (Reserved)</p> <p>3: For training with regard to Class 7, see also 1.7.2.5.</p>	<p><i>Difference in kind regarding footnote to the first paragraph.</i></p> <p><i>Consider additionally.</i></p>	<p><i>Chapter 1.3 of SMGS does not contain significant differences and is adapted to the legal system of the CIS countries.</i></p> <p><i>Difference in kind in the footnote to the first paragraph.</i></p> <p><i>“*Provisions of Chapter 1.10 shall apply only if it is provided for in the domestic legislation.”</i></p>
1.4.1.3	<p>Safety measures provided for in domestic legislation and regulations shall be applied when receiving dangerous goods for carriage, loading and unloading as well as when composing trains and inspecting wagons and containers.</p> <p>In all other instances, the carriage of dangerous goods shall be governed by the provisions of SMGS.</p>	<p>RID may specify certain of the obligations falling to the various participants.</p> <p>If an RID Contracting State considers that no lessening of safety is involved, it may in its domestic legislation transfer the obligations falling to a specific participant to one or several other participants, provided that the obligations of 1.4.2 and 1.4.3 are met. These derogations shall be communicated by the RID Contracting State to the Secre-</p>	<p><i>Difference in kind.</i></p> <p><i>Consider inclusion of text of paragraph 2 of RID.</i></p> <p><i>Latvia has prepared a proposal for discussion at</i></p>	<p><i>No differences in purpose, however, reference only to domestic legislation. Certain countries consider only the consignor, the carrier, and the consignee.</i></p>

		<p>tariat of OTIF which will bring them to the attention of the other RID Contracting States. The requirements of 1.2.1, 1.4.2 and 1.4.3 concerning the definitions of participants and their respective obligations shall not affect the provisions of domestic law concerning the legal consequences (criminal nature, liability, etc.) stemming from the fact that the participant in question is e.g. a legal entity, a self-employed worker, an employer or an employee.</p>	<p><i>the OSJD meeting.</i></p>	
<p>1.4.2.1.1</p>	<p>The consignor of dangerous goods is required to hand over for carriage only consignments which conform to the requirements of <i>Annex 2 to SMGS</i>. In the context of <i>compliance with general safety measures he shall:</i></p> <ul style="list-style-type: none"> (a) ascertain that the dangerous goods are classified and authorized for carriage in accordance with <i>Annex 2 to SMGS</i>; (b) <i>comply with requirements for packages and mixed packing conditions;</i> (c) <i>comply with requirements concerning marking and labelling with danger markings and labels;</i> (d) <i>furnish the carrier with information and data in a traceable form and, if necessary, the required transport documents and accompanying documents (authorizations, approvals, notifications, certificates, etc.), taking into account in particular the requirements of Chapter 5.4 and of Table A of Chapter 3.2;</i> (e) use packagings, large packagings, intermediate bulk containers (IBCs) and tanks (tank-wagons, demountable tanks, battery-wagons, MEGCs, portable tanks and tank-containers) approved for and suited to the carriage of the substances concerned and bearing the markings prescribed by <i>Annex 2 to SMGS</i>; (f) comply with the requirements on the means 	<p>The consignor of dangerous goods is required to hand over for carriage only consignments which conform to the requirements of <i>RID</i>. In the context of 1.4.1, he shall in particular:</p> <ul style="list-style-type: none"> (a) ascertain that the dangerous goods are classified and authorized for carriage in accordance with <i>RID</i>; (b) furnish the carrier with information and data <i>in a traceable form</i> and, if necessary, the required transport documents and accompanying documents (authorizations, approvals, notifications, certificates, etc.), taking into account in particular the requirements of Chapter 5.4 and of <i>Table A of Chapter 3.2</i>; (c) use only packagings, large packagings, intermediate bulk containers (IBCs) and tanks (tank-wagons, demountable tanks, battery-wagons, MEGCs, portable tanks and tank-containers) approved for and suited to the carriage of the substances concerned and bearing the markings prescribed by <i>RID</i>; (d) comply with the requirements on the means of dispatch and on forwarding restrictions; (e) <i>ensure that even empty uncleaned and not degassed tanks (tank-wagons, demountable tanks, battery-wagons, MEGCs, portable tanks and tank-containers) or empty uncleaned wagons and large</i> 	<p><i>Difference in kind.</i> <i>Consider additionally:</i> - review conformity of 1.4.2 with the requirements in 1.4.3; - <i>correct subparagraph (l): observe the maximum and minimum permissible degree...</i></p>	<p><i>The duties of the consignor are supplemented with the duties of other participants in accordance with 1.4.3. Some countries consider only the consignor, the carrier and the consignee.</i></p>

	<p>of dispatch and on forwarding restrictions;</p> <p>(g) in certain cases clean residue of the goods from empty tank-wagons, demountable tanks, battery-wagons, portable tanks and tank-containers and when cleaning remove (cover) danger markings and labels as well as orange-coloured plates from the tank shells;</p> <p>(h) when loading dangerous goods with different names together into the same wagon or container, comply with the prohibitions on mixed loading as indicated in Chapter 7.5.2 as well as requirements concerning the separation of foodstuffs, other articles of consumption or animal feedstuffs as indicated in Chapter 7.5.4;</p> <p>(i) define the technical and commercial suitability of tanks for carriage of the goods in question and prepare private or rented tanks for loading at his own expense;</p> <p>(j) ascertain that the periodic test for tank-wagons, demountable tanks, battery-wagons, portable tanks, tank-containers and MEGC has not expired;</p> <p>(k) fill the tank-wagons, demountable tanks, battery-wagons, portable tanks and tank-containers with dangerous goods authorised for carriage in those tanks, and when necessary comply with the requirements concerning dangerous goods in adjoining compartments;</p> <p>(l) observe the maximum and minimum permissible degree of filling for tank-wagons, demountable tanks, battery-wagons, portable tanks and tank-containers;</p> <p>(m) after filling the tank check the leakproofness of the closing devices of tank-wagons, demountable tanks, battery-wagons, portable tanks and tank-containers;</p> <p>(n) ensure that no residue of the filling substance</p>	<p>and small bulk containers are appropriately marked and labelled and that empty uncleaned tanks are closed and present the same degree of leakproofness as if they were full.</p>		
--	--	---	--	--

	<p>adheres to the outside of the tanks;</p> <p>(o) affix danger markings and labels and the orange-coloured plates to the wagons, tank-wagons, demountable tanks, battery-wagons, portable tanks and containers in accordance with the requirements of Chapter 5.3;</p> <p>(p) when loading dangerous goods in a wagon or container comply with technical requirements for loading and securing goods;</p> <p>(q) ensure (including in agreement with the consignee) compliance with requirements of additional special provisions with the codes starting with letters “CW” prescribed in Chapter 7.5.11, if during the journey the goods must be transhipped from wagons with gauge width 1435 mm to wagons with gauge width 1520 mm.</p>			
1.4.2.1.2	<p>If the consignor uses the services of other participants (packer, loader, filler, etc.), he shall take appropriate measures to ensure that these participants comply with the requirements of Annex 2 to SMGS.</p>	<p>If the consignor uses the services of other participants (packer, loader, filler, etc.), he shall take appropriate measures to ensure that the consignment meets the requirements of RID. He may, however, in the case of 1.4.2.1.1 (a), (b), (c) and (e), rely on the information and data made available to him by other participants.</p>	<p><i>Difference in kind.</i> <i>Consider additionally:</i> - review conformity of 1.4.2 with the requirements in 1.4.3.</p>	<p><i>The duties of the consignor are supplemented with the duties of other participants in accordance with 1.4.3. Some countries consider only the consignor, the carrier and the consignee.</i></p>
1.4.2.2.4	<p>If, during the journey, an infringement which could jeopardize the safety of the operation is observed, the consignment shall be halted.</p> <p>In this case the carrier shall handle the goods in accordance with the requirements of SMGS and the domestic legislation.</p>	<p>If, during the journey, an infringement which could jeopardize the safety of the operation is observed, the consignment shall be halted as soon as possible bearing in mind the requirements of traffic safety, of the safe immobilisation of the consignment, and of public safety.</p> <p>The transport operation may only be continued once the consignment complies with applicable regulations. The competent authority(ies) concerned by the rest of the journey may grant an authorization to pursue the transport operation.</p> <p>In case the required compliance cannot be achieved and no authorization is granted for the</p>	<p><i>Differences in kind.</i> <i>No changes required.</i></p>	<p><i>Annex 2, SMGS does not contain a single procedure for halting the transportation in the case where an infringement is observed and for continuation of the transportation once the infringement is removed.</i></p>

		rest of the journey, the competent authority(ies) shall provide the carrier with the necessary administrative assistance. The same shall apply in case the carrier informs this/these competent authority(ies) that the dangerous nature of the goods carried was not communicated to him by the consignor and that he wishes, by virtue of the law applicable in particular to the contract of carriage, to unload, destroy or render the goods harmless.		
1.4.2.3.4	If, during the journey, the goods must be transhipped from wagons with gauge width 1435mm to wagons with gauge width 1520mm, the consignee shall ensure (including in agreement with the consignor) compliance with requirements of additional special provisions CW46-CW58 and CW60-CW69 prescribed in Chapter 7.5.11.	No text	<i>Difference in kind. No changes to the text required.</i>	<i>Additional requirement with consideration of carriage by rail with gauge widths 1520 mm and 1435 mm.</i>
1.4.3	<i>Note: Requirements of 1.4.3.1-1.4.3.3, 1.4.3.6 and 1.4.3.7 shall apply in Hungary, Republic of Latvia, Republic of Lithuania, Republic of Poland, Slovak Republic, and Republic of Estonia.</i>	No text	<i>Difference in kind. Consider additionally the need to review conformity of 1.4.2 with the requirements in 1.4.3.</i>	<i>The duties of the consignor are supplemented with the duties of other participants in accordance with 1.4.3. Countries not indicated in this note consider only the consignor, the carrier and the consignee.</i>
1.5.1.1	As opposed to requirements prescribed by Annex 2 to SMGS, contracting parties may agree directly among themselves to authorize certain transport operations of dangerous goods by temporary derogation from the requirements of Annex 2 to SMGS, provided that safety is not compromised thereby. The consignor shall solicit the carrier of the forwarding country for a special arrangement and shall provide the necessary data. The carrier of the forwarding country shall notify	The competent authorities of the RID Contracting States may agree directly among themselves to authorize certain transport operations in their territories by temporary derogation from the requirements of RID, provided that safety is not compromised thereby. The authority which has taken the initiative with respect to the temporary derogation shall notify such derogations to the Secretariat of OTIF which shall bring them to the attention of the RID Contracting States	<i>Difference in kind. Consider additionally.</i>	<i>Temporary derogation procedure in Annex 2, SMGS, differs from RID and does not involve participation of the competent authorities.</i>

	<p>the carriers of the countries participating in the shipment of the data on the conclusion of the special arrangement. The carriers of concerned countries shall notify their decision in the shortest possible time.</p> <p>The carriers shall also provide for the necessary arrangements with the competent authorities of their countries.</p> <p>The carrier of the forwarding country who has been asked for a special arrangement notifies the consignor of the approval of such consignment and conveys to him the registration number of the special arrangement (for example, RZD I/2005). The consignor shall indicate in the consignment note in the column “Shipping Name” “Approved by SMGS, Annex 2 RZD I/2005” in addition to the data prescribed in 5.4.1.1.</p>			
<p>1.6. All paragraphs</p>	<p>For example:</p> <p>1.6.1.1 Unless otherwise provided, the substances and articles of Annex 2 to SMGS may be carried until 31 December 2013 in accordance with the requirements of Annex 2 to SMGS applicable up to 1 July 2013.</p>	<p>For example:</p> <p>1.6.1.1 Unless otherwise provided, the substances and articles of RID may be carried until 30 June 2013 in accordance with the requirements of RID applicable up to 31 December 2012.</p>	<p><i>Difference in kind.</i> <i>No changes required.</i></p>	<p><i>The date of entry into force of the new version is 6 months later in Annex 2, SMGS than this date in RID due to the decision-making procedure in OSJD (Organization for Cooperation of Railways).</i></p>
<p>1.6.1.3 – 1.6.1.5</p>	<p>(reserved)</p>	<p>1.6.1.3 Substances and articles of Class 1, belonging to the armed forces of an RID Contracting State, that were packaged prior to 1 January 1990 in accordance with the requirements of RID in effect at that time may be carried after 31 December 1989 provided the packagings maintain their integrity and are declared in the transport document as military goods packaged prior to 1 January 1990. The other requirements applicable as from 1 January 1990 for this class shall be complied with.</p>	<p><i>Difference in kind.</i> <i>No changes required.</i></p>	<p><i>Annex 2, SMGS does not contain certain transitional provisions which had not been harmonized with the equivalent provisions of RID.</i></p>

		<p>1.6.1.4 Substances and articles of Class 1 that were packaged between 1 January 1990 and 31 December 1996 in accordance with the requirements of RID in effect at that time may be carried after 31 December 1996, provided the packagings maintain their integrity and are declared in the transport document as goods of Class 1 packaged between 1 January 1990 and 31 December 1996.</p> <p>1.6.1.5 IBCs built in accordance with the requirements of marg. 405 (5) and 555 (3) in force before 1 January 1999, but which do not meet the requirements of marg. 405 (5) and 555 (3) in force after 1 January 1999, may still be used.</p>		
1.6.3.1	Tank-wagons constructed before 1 January 2005 in accordance with the requirements of Annex 2 to SMGS in force up to 31 December 2004, but which do not, however, conform to the requirements applicable as from 1 January 2005, may still be used with due consideration of the transitional requirements of 1.6.3.4 – 1.6.3.7.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.2	The periodic tests for tank-wagons kept in service under these transitional requirements shall be conducted in accordance with the pertinent special requirements for the various consignments.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.3	Tank-wagons constructed before 1 July 2005 in accordance with the requirements of Annex 2 to SMGS in force up to 1 July 2005, but which do not, however, conform to the requirements applicable as from 1 July 2005 may still be used after this date.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.4	Tank-wagons with bottom discharge outlets for carriage of Class 3 liquid substances constructed before 1 January 2005 may have two serially fitted	RID text not cited.	<i>Difference in kind. No changes re-</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons con-</i>

	and mutually independent shut-off devices. They shall include: an internal (main) shutter and a liquid tight closure at the end of the discharge pipe, under the condition that all elements of the discharge unit are safe for operation and environment.		<i>quired.</i>	<i>structed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.5	Tank-wagons with gauge width 1520 mm for petroleum products and alcohols constructed before 1 January 2005 may be used without plates up to 1 January 2011. The decision on carriage of such tank-wagons to Bulgaria, Hungary, Poland, Romania, and Slovakia within this timeframe shall be taken upon separate arrangement.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.6	On tank-wagons with gauge width 1520mm constructed before 1 January 2005 the plate may be affixed to the butt end of the span bolster.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.7	Tank-wagons in service may be used without stop-valves and shut-off devices prescribed in 6.8.3.2.3 and 6.8.3.2.4 until 1 January 2014 provided all necessary safety and environmental requirements are met.	RID text not cited.	<i>Difference in kind. No changes required.</i>	<i>Transitional requirements of Annex 2, SMGS regarding tank-wagons constructed before the introduction of changes to the rules of 1 July 2005.</i>
1.6.3.18	Tank-wagons without an international classification code and appropriate markings may be used until 1 July 2011. Tank-wagons shall be marked with the relevant alphanumeric code as prescribed in special provision TC and TE in accordance with Chapter 6.8.4 when tank codes are assigned or during one of the tests in accordance with 6.8.2.4 after assignment of tank codes before 1 July 2011. Date of the next test of the tank inscribed in accordance with 6.8.2.5.2 need not be inscribed be-	Tank-wagons and battery-wagons constructed before 1 January 2003 in accordance with the requirements in force up to 30 June 2001, but which do not, however, conform to the requirements applicable as from 1 July 2001, may still be used. However, they shall be marked with the relevant tank code and if applicable the relevant alphanumeric codes of special provisions TC and TE in accordance with 6.8.4.	<i>Difference in kind. No changes required.</i>	<i>Last paragraph of Annex 2, SMGS contains an additional transitional requirement.</i>

	fore the next inspection in accordance with 6.8.2.4 after 1 January 2012.			
1.6.3.26	Tank-wagons constructed before 1 January 2008 in accordance with the requirements in force up to 1 July 2007, but which do not, however, conform to the requirements regarding the marking of the external design pressure in accordance with 6.8.2.5.1 in force as from 1 July 2007, may still be used. Tank-wagons constructed after 1 January 2008 and before 1 January 2009 may have stencilled markings of the external design pressure.	Tank-wagons constructed before 1 January 2007 in accordance with the requirements in force up to 31 December 2006 but which do not, however, conform to the requirements applicable as from 1 January 2007 regarding the marking of the external design pressure in accordance with 6.8.2.5.1, may still be used.	<i>Difference in kind.</i> <i>No changes required.</i>	<i>Last paragraph of Annex 2, SMGS contains an additional transitional requirement.</i>
1.6.3.27	(a) Tank-wagons and battery-wagons – for gases of Class 2 with classification codes T, TF, TC, TO, TFC or TOC, – for substances of classes 3 to 8 carried in the liquid state and to which tank code L15CH, L15DH or L21DH is assigned in column (12) of Table A of Chapter 3.2, constructed before 1 July 2006 and which do not conform to the applicable requirements of special provision TE22 of 6.8.4 in force from 1 July 2006 may still be used. However, by no later than 1 January 2014 they shall be fitted with the devices capable of energy absorption in accordance with the requirements of the competent authority.	(a) For tank-wagons and battery-wagons – for gases of Class 2 with classification codes containing the letter(s) T, TF, TC, TO, TFC or TOC, and – for substances of classes 3 to 8 carried in the liquid state and to which tank code L15CH, L15DH or L21DH is assigned in column (12) of Table A of Chapter 3.2, constructed before 1 January 2005, the devices defined in special provision TE 22 of 6.8.4 must be capable of absorbing at least 500 kJ of energy at each end of the wagon.	<i>Difference in kind.</i> <i>No changes required.</i>	<i>Difference regarding special provision TE 22.</i>
1.6.3.31	(reserved)	Tank-wagons and tanks forming elements of battery-wagons designed and constructed in accordance with a technical code which was recognized at the time of their construction according to the provisions of 6.8.2.7 which were applicable at that time may still be used.	<i>Difference in kind.</i> <i>No changes required.</i>	<i>Annex 2, SMGS does not provide for mandatory standards.</i>
1.6.3.51	When the shell of a tank-wagon was already divided by partitions or surge plates into section of not more than 7 500 litres capacity before 1 July	No text	<i>Difference in kind.</i> <i>No changes re-</i>	<i>The requirements prescribed in 4.3.2.2.4 of Annex 2, SMGS also apply to</i>

	2009, the capacity of the shell need not be supplemented with the symbol “S” in the particulars required by 6.8.2.5.1 until the next periodic inspection according to 6.8.2.4.2 is performed.		<i>quired.</i>	<i>tank-wagons.</i>
1.6.3.52	Notwithstanding the provisions of 4.3.2.2.4, tank-wagons intended for the carriage of liquefied gases or refrigerated liquefied gases, which meet the applicable construction requirements of Annex 2 to SMGS but which were not divided, before 1 July 2009, by partitions or surge plates into sections of less than 7 500 litres capacity may still be filled to more than 20% and less than 80% of their capacity. <i>Note: The requirements of this paragraph shall not apply to carriage on the territory of the Russian Federation.</i>	No text	<i>Difference in kind. No changes required.</i>	<i>The requirements prescribed in 4.3.2.2.4 of Annex 2, SMGS also cover tank-wagons.</i>
1.6.3.50	Tank-wagons constructed before 1 July 2007 in accordance with the requirements in force up to 1 July 2007, but which do not conform to the requirements in 6.8.1.8 and 6.8.2.1.10 for ambient temperature ranges in force as from 1 July 2007, may still be used.	No text	<i>Difference in kind. No changes required.</i>	<i>Difference regarding ambient temperature ranges.</i>
1.6.4.3 – 1.6.4.4, 1.6.4.7 - 1.6.4.11, 1.6.4.14	(reserved)	RID text not cited.	<i>Difference in kind. Requires additional discussion.</i>	<i>No comparable provisions in Annex 2, SMGS before 1 July 2005.</i>
1.6.4.12	(reserved)	Tank-containers and MEGCs constructed before 1 January 2003 in accordance with the requirements applicable up to 30 June 2001, but which do not, however, conform to the requirements applicable as from 1 July 2001, may still be used. However, they shall be marked with the relevant tank code and if applicable the relevant alphanumeric codes of special provisions TC and TE in accordance with 6.8.4.	<i>Difference in kind. Requires additional discussion. Differences eliminated from 1 July 2013.</i>	<i>No transitional requirement in Annex 2, SMGS.</i>

1.6.4.33	Notwithstanding the provisions of 4.3.2.2.4, tank-containers intended for the carriage of liquefied gases or refrigerated liquefied gases, which meet the applicable construction requirements of Annex 2 to SMGS but which were not divided, before 1 July 2009, by partitions or surge plates into sections of less than 7 500 litres capacity may still be filled to more than 20% and less than 80% of their capacity. <i>Note: The requirements of this paragraph shall not apply to carriage on the territory of the Russian Federation.</i>	Notwithstanding the provisions of 4.3.2.2.4, tank-containers intended for the carriage of liquefied gases or refrigerated liquefied gases, which meet the applicable construction requirements of RID but which were divided, before 1 July 2009, by partitions or surge plates into sections of more than 7 500 litres capacity may still be filled to more than 20% and less than 80% of their capacity.	<i>Difference in kind. No changes required.</i>	<i>Additional note.</i>
Chapter 1.8 footnote	<i>* The provisions of Chapter 1.8 shall apply only if this is provided for in the domestic legislation.</i>	No footnote	<i>Difference in kind. No changes required.</i>	<i>Additional footnote.</i>
1.8.5.2	(reserved)	The RID Contracting State shall in turn, if necessary, make a report to the Secretariat of OTIF with a view to informing the other RID Contracting States.	<i>Difference in kind. No changes required.</i>	<i>Stated procedure is not used on the agenda of the OSJD Committee.</i>
1.9.3	(reserved)	Application of the additional provisions in accordance with 1.9.2 (a) and (b) presupposes that the competent authority provides evidence of the need for measures.	<i>Difference in kind. No changes required.</i>	<i>Annex 2, SMGS does not contain this requirement.</i>
1.9.4	(reserved)	The competent authority of the RID Contracting State applying on its territory any additional provisions within the scope of 1.9.2 (a) and (b) above shall notify the Secretariat of OTIF, in general in advance, of the additional provisions. The Secretariat of OTIF shall bring them to the attention of the RID Contracting States.	<i>Difference in kind. No changes required.</i>	<i>Stated procedure is not used on the agenda of the OSJD Committee.</i>
Chapter 1.10 footnote	<i>* The provisions of Chapter 1.10 shall apply only if this is provided for in the domestic legislation.</i>	No footnote	<i>Difference in kind. No changes required.</i>	<i>Additional footnote.</i>
3.2.1	(reserved)	"Colis express (express parcels)"	<i>Difference in</i>	<i>Within OSJD carriage of</i>

<p>Column (19), Table A</p>		<p>Contains alphanumeric codes beginning with the letters "CE" for the requirements applicable to forwarding as Colis Express (express parcels). These requirements are given in Chapter 7.6. When column 19 does not contain a code, forwarding as Colis Express (express parcels) is not permitted.</p>	<p><i>kind. No changes required.</i></p>	<p><i>parcels is performed in accordance with the Agreement on International Passenger Railway Traffic according to which carriage of dangerous goods in passenger trains is prohibited.</i></p>
<p>3.2.1 Column (21a)</p>	<p>Column (21a) “Emergency Card Number¹” In this column numbers of emergency cards shall be indicated, which the consignor shall specify in column (11) “Shipping Name” of the consignment note. For the procedure for filling out the consignment note see 5.4.1. If column (21a) does not contain emergency card information, it indicates that an emergency card has not been devised for this consignment to date and that consignor/consignee shall devise such emergency card in good time and attach it to transport documents. For general provisions on emergency cards see 5.4.3.11 and 5.4.3.12. ¹ Requirements in explanations to columns (21a), (21b) and (21c) shall not apply when the forwarding country is Hungary, Republic of Poland, and Slovak Republic or when the consignment note is reissued in these countries.</p>	<p>No text</p>	<p><i>Difference in kind. 		ture, whichever is higher.	quired.	and 2217
3.3.1 SP800	For carriage of uncleaned empty tanks an additional inscription shall be made in the consignment note: "The tank is filled with _____*" in accordance with special provision TU 16." *indicates the name of the protective agent. For liquids, the mass shall be indicated, for gases, the pressure shall be indicated.	No text	<i>Difference in kind. No changes required.</i>	<i>Special provision for phosphorus UN 1381 and 2447 in accordance with which the consignment note should indicate the name of the protective agent.</i>
3.4	<i>Note: When carrying in the territory of the CIS countries goods in wagonloads packed in accordance with the requirements of Chapter 3.4, with total weight of more than 8 tons the provisions of 5.3, 5.4 and part 7 shall apply as well as the corresponding columns in Table A, Chapter 3.2, Annex 2 to SMGS.</i>	No text	<i>Difference in kind. No changes required.</i>	<i>Additional requirements in the CIS countries, in accordance with which goods packed in accordance with the requirements of Chapter 3.4, with total weight of more than 8 tons shall be transported in one wagon by wagonloads as dangerous goods.</i>
P002	Special provision for packing provided for only in Annex 2 to SMGS RR100 For UN numbers 1680 and 1689: when carrying to a destination in or through the territory of the Republic of Belarus, Republic of Kazakhstan, Russian Federation, and Ukraine single packagings shall have an additional leakproof liner and shall have a capacity of no more than 100 litres and a net mass of no more than (100 + 0.5) kg.	No text	<i>Difference in kind. No changes required.</i>	<i>Special provision for UN numbers 1680 and 1689 according to which when carrying to a destination in or through the territory of the Republic of Belarus, Republic of Kazakhstan, Russian Federation, and Ukraine single packagings shall have an additional leakproof liner and shall have a capacity of no more than 100 litres and a net mass of no more than (100 + 0.5) kg.</i>
P801a footnote	Carriage in sheeted wagons and open sheeted containers to a destination in the Republic of Belarus,	No text	<i>Difference in kind.</i>	<i>Relates to the footnote to paragraphs of Chapter</i>

to sub-paragraph (e)	Republic of Kazakhstan, Russian Federation, Republic of Uzbekistan or in transit through the territory thereof is prohibited.		<i>Requires additional consideration.</i>	7.2.
IBC07	Special packing provision provided for only in Annex 2 to SMGS B100 For UN numbers 1680 and 1689: when carrying to a destination in or in transit through the territories of the Republic of Belarus, Republic of Kazakhstan, Russian Federation, and Ukraine, IBCs prescribed in this packing instruction shall not be used.	No text	<i>Difference in kind. No changes required.</i>	<i>Special provision for UN 1680 and 1689 in accordance with which when carrying goods to a destination in or in transit through the territories of the Republic of Belarus, Republic of Kazakhstan, Russian Federation, and Ukraine, IBCs are not used.</i>
TP60	Carriage in portable tanks to a destination in the Republic of Belarus, Republic of Kazakhstan, Russian Federation, and Ukraine or in transit through their territory shall be prohibited.	No text	<i>Difference in kind. No changes required.</i>	<i>Special provision for UN numbers 1009, 2035, 3220 and 3252.</i>
4.3.2.1.6	Foodstuffs shall not be carried in tanks used for dangerous substances unless the necessary steps have been taken to prevent any harm to human or animal health. ² ² When carrying foodstuffs to/from the Republic of Kazakhstan and Russian Federation tanks used for dangerous substances shall not be used.	Foodstuffs shall not be carried in tanks used for dangerous substances unless the necessary steps have been taken to prevent any harm to public health.	<i>Difference in kind. Only in the footnote. No changes required.</i>	<i>Additional footnote (2).</i>
4.3.2.2.4 Left side of the page	Shells intended for the carriage of substances in the liquid state or liquefied gases or refrigerated liquefied gases, which are not divided by partitions or surge plates into sections of not more than 7 500 litres capacity, shall be filled to not less than 80% or not more than 20% of their capacity. This provision shall not apply to: - liquids with a kinematic viscosity at 20°C of at least 2 680mm ² /s; - molten substances with a kinematic viscosity at	(Reserved)	<i>Difference in kind. No changes required.</i>	<i>In RID this text is present only in the right-hand column and covers only tank-containers. In Annex 2 to SMGS these requirements cover tank-wagons as well.</i>

	the temperature of filling of at least 2 680 mm ² /s; – UN 1963 HELIUM, REFRIGERATED, LIQUID and UN 1966 HYDROGEN, REFRIGERATED, LIQUID.			
4.3.2.3.3 End of the text	This also applies to the upper part of the dip tube.	This also applies to the upper part of the dip tube.	<i>Differences eliminated from 1 July 2013.</i>	<i>Not in Annex 2 to SMGS.</i>
4.3.2.3.6	Substances which may react dangerously with each other shall not be carried in compartments of the same tank except when: - these compartments are separated by a partition with a wall thickness equal to or greater than that of the tank shell itself; - there is an empty space or an empty compartment between loaded compartments. Note: For carriage in the Russian Federation, separation of loaded compartments with empty compartments is not permitted .	Substances which may react dangerously with each other shall not be carried in adjoining compartments of tanks. Substances which may react dangerously with each other may be carried in adjoining compartments of tanks, when these compartments are separated by a partition with a wall thickness equal to or greater than that of the tank itself. They may also be carried separated by an empty space or an empty compartment between loaded compartments.	<i>Difference in kind (only in the note) No changes required.</i>	<i>Peculiarities of railway use in the Russian Federation.</i>
4.3.2.3.7	Carriage by rail with gauge 1520 mm in large tank-containers intended for a longitudinal inertial force of 2 Rg shall be performed only upon special arrangement.	No text	<i>Difference in kind. No changes required.</i>	<i>Additional requirement for tank-containers.</i>
4.3.2.3.8	Shells intended for carriage to or through the territory of the Russian Federation or the Republic of Kazakhstan in the period from 1 November to 1 April shall be made of materials with design temperature range -50°C to 50°C. (see 6.8.2.1.8, 6.8.2.1.10).	No text	<i>Difference in kind. No changes required.</i>	<i>Additional requirement.</i>
4.3.3.4.1 Beginning of the text	The consignor shall:	No text	<i>Difference in kind, in reference to the requirements in Chapters 1.4.2 and 1.4.3. No changes required.</i>	<i>The duties of the consignor are supplemented with the duties of other participants in accordance with 1.4.3. Some countries consider only the consignor, the carrier and the consignee.</i>
4.3.3.4.3 End of the text	In Poland, Slovakia, Hungary, Romania, Latvia, Lithuania, and Estonia the control under this paragraph shall be performed by the filler, the loader or the consignor in accordance with the agreement between these parties.			

4.3.3.5	Carriage by rail with gauge width 1520 mm in tank-wagons and tank-containers specified in 6.8.5 with shells with hard-soldered fittings may be performed upon special agreement (see 6.8.5.1.3 and 6.8.5.1.4).	No text	<i>Difference in kind. No changes required.</i>	<i>Additional requirement.</i>
4.3.4.1.2	<i>Note: Part 1 of the tank hierarchy shall not be used for the railways of Kazakhstan, Russian Federation and Ukraine.</i>	No text	<i>Difference in kind. No changes required.</i>	<i>Additional requirement.</i>
4.3.4.2.2	The flexible hoses for filling and discharge, with non-rigid coupling to the shell, shall be empty during carriage.	The connecting pipes between the shells of several independent but interconnected tank-wagons (complete train, for example) shall be empty during carriage.	<i>Difference in kind. Consider additionally. Latvia has prepared a proposal for discussion at the OSJD meeting.</i>	<i>Inaccurate translation.</i>
4.3.4.2.3	(reserved)	When shells approved for liquefied gases of Class 2 are also approved for liquids of other classes, the orange band in accordance with 5.3.5 shall be covered or made unrecognisable by other means so that it is not visible during the carriage of these liquids. During the carriage of these liquids, the particulars according to 6.8.3.5.6 (b) or (c) shall no longer be visible on the two sides of the tank-wagon or on the panels.	<i>Difference in kind. With consideration of 5.3.5. Consider additionally. Latvia has prepared a proposal for discussion at the OSJD meeting.</i>	<i>Items considered in this requirement of RID are reflected in 5.3.5 of Annex 2, SMGS.</i>
TU21	The substance shall, if water is used as a protective agent, be covered with a depth of not less than 12 cm of water; the degree of filling at a temperature of 60 °C shall not exceed 98%. For carriage by rail with gauge width 1520 mm the substance shall be covered with a depth of no less than 30 cm of water; when forwarding to areas	The substance shall, if water is used as a protective agent, be covered with a depth of not less than 12 cm of water at the time of filling; the degree of filling at a temperature of 60 °C shall not exceed 98%. If nitrogen is used as a protective agent, the degree of filling at a temperature of 60 °C shall not exceed 96%. The remaining space shall be	<i>Difference in kind. 	tained in 6.7.3.8.1.1.			
6.8.3.2.20 First sentence	The manifold shall be designed for service in a temperature range of -50 °C to + 50 °C*. * For wagons in service on gauge width 1435 mm the temperature range shall be -20 °C to +50 °C.	The manifold shall be designed for service in a temperature range of -20 °C to +50 °C.	<i>Difference in kind. No changes required.</i>	<i>Differences in the ambient temperature range.</i>
6.8.3.4.2	The basic requirements for the test pressure are given in 4.3.3.2.1 to 4.3.3.2.4 and in the table in 4.3.3.2.5. In all cases the test pressure shall be no less than 1.25 times the design pressure in accordance with 6.8.2.1.15.	The basic requirements for the test pressure are given in 4.3.3.2.1 to 4.3.3.2.4 and the minimum test pressures are given in the table of gases and gas mixtures in 4.3.3.2.5.	<i>Difference in kind. No changes required.</i>	<i>Additional requirement for test pressure.</i>
6.8.3.7	<i>Requirements for battery-wagons and MEGCs which are not designed, constructed and tested according to referenced standards</i> Battery-tanks and MEGCs which are not designed, constructed and tested according to standards referenced in 6.8.3.6 shall be designed, constructed and tested in accordance with the technical code approved by the competent authority providing for the same level of safety. They shall, however, comply with the requirements of 6.8.3.	Requirements for battery-wagons and MEGCs which are not designed, constructed and tested according to referenced standards To reflect scientific and technical progress or where no standard is referenced in 6.8.3.6 or to deal with specific aspects not addressed in a standard referenced in 6.8.3.6, the competent authority may recognize the use of a technical code providing the same level of safety. Battery-wagons and MEGCs shall, however, comply with the minimum requirements of 6.8.3. In the type approval the issuing body shall specify the procedure for periodic inspections if the standards referenced in 6.2.2, 6.2.4 or 6.8.2.6 are not applicable or shall not be applied. The competent authority shall transmit to the secretariat of OTIF a list of the technical codes that it recognises. The list should include the following details: name and date of the code, purpose of the code and details of where it may be obtained. The secretariat shall make this information publicly available on its website. A standard which has been adopted for reference in a future edition of the RID may be approved by	<i>Difference in kind. No changes required.</i>	<i>Annex 2, SMGS does not contain the requirement for mandatory use of the standards.</i>

		the competent authority for use without notifying the OTIF secretariat.		
6.8.4 TC2	Shells, and their items of equipment, shall be made of aluminium not less than 99.5 % pure or of suitable steel not liable to cause hydrogen peroxide to decompose. The wall thickness shall be calculated in accordance with 6.8.2.1.17 to 6.8.2.1.21.	Shells, and their items of equipment, shall be made of aluminium not less than 99.5% pure or of suitable steel not liable to cause hydrogen peroxide to decompose. Where shells are made of aluminium not less than 99.5% pure, the wall thickness need not exceed 15 mm, even where calculation in accordance with 6.8.2.1.17 gives a higher value.	<i>Difference in kind. No changes required.</i>	<i>Calculation requirements for tank design in accordance with the strength standards approved for the CIS countries.</i>
6.8.4 TC6	Where the use of aluminium is necessary for tanks, such tanks shall be made of aluminium not less than 99.5 % pure. The wall thickness shall be calculated in accordance with 6.8.2.1.17 to 6.8.2.1.21.	Where the use of aluminium is necessary for tanks, such tanks shall be made of aluminium not less than 99.5 % pure; the wall thickness need not exceed 15 mm even where calculation in accordance with 6.8.2.1.17 gives a higher value.	<i>Difference in kind. No changes required.</i>	<i>Calculation requirements for tank design in accordance with the strength standards approved for the CIS countries.</i>
6.8.4 TE 22	Each end of tank-wagons for substances carried in the liquid state and gases or battery-wagons shall be capable of withstanding the emerging dynamic stress and of absorbing the energy by means of elastic or plastic deformation of structural parts of the tank-wagon (e.g. with the use of crash elements). The energy absorption shall be determined in relation to a collision on a straight track. Energy absorption by means of plastic deformation shall only occur in conditions other than those encountered during normal conditions of rail transport (impact speed higher than 12 km/h or individual buffer force greater than 1500 kN). Energy absorption at each end of the wagon shall not lead to transfer of energy to the shell which could cause plastic deformation of the shell. The requirements of this special provision are deemed to be met if crashworthy buffers (energy absorption elements) that conform to clause 7 of standard EN 15551:2009 (Railway applications – Freight wagons – Buffers) are used and if the	In order to reduce the extent of damage in the event of a collision shock or accident, each end of tank-wagons for substances carried in the liquid state and gases or battery-wagons shall be capable of absorbing at least 800 kJ of energy by means of elastic or plastic deformation of defined components of the subframe or by means of a similar procedure (e.g. crash elements). The energy absorption shall be determined in relation to a collision on a straight track. Energy absorption by means of plastic deformation shall only occur in conditions other than those encountered during normal conditions of rail transport (impact speed higher than 12 km/h or individual buffer force greater than 1500 kN). Energy absorption of not more than 800 kJ at each end of the wagon shall not lead to transfer of energy to the shell which could cause visible, permanent deformation of the shell. The requirements of this special provision are deemed to be met if crashworthy buffers (energy	<i>Difference in kind. No changes required.</i>	<i>Annex 2, SMGS, says that the evaluation criteria and testing procedures are defined by the requirements of the competent authority.</i>

	wagon body satisfies clause 6.3 and sub clause 8.2.5.3 of standard EN 12663-2:2010 (Railway applications – Structural requirements of railway vehicle bodies – Part 2: Freight wagons). <i>Note 1: Evaluation criteria for the design and testing methods shall be set forth in the requirements of the competent authority.</i>	absorption elements) that conform to clause 7 of standard EN 15551:2009 (Railway applications – Freight wagons – Buffers) are used and if the wagon body satisfies clause 6.3 and sub clause 8.2.5.3 of standard EN 12663-2:2010 (Railway applications – Structural requirements of railway vehicle bodies – Part 2: Freight wagons).		
6.8.4 TE 25 Additional paragraph (e)	(e) Protective shields for the floors of tanks fitted with automatic couplers. If a protective shield is used for the tank floors, the following requirements shall be met: - the protective shields shall cover the floor of the tank up to the height of 1100 mm (measuring from the top edge of the front beam), the coupler head shall be fitted with anticreep devices to prevent unintentional uncoupling. The protective shield shall be no less than 1200 mm wide along the aforementioned height; - the protective shield shall have a minimum wall thickness of 12 mm; <i>The protective shields and areas of fastening of the shields shall be designed in such a way as to minimize the potential for damage of the tank floor with the protective shield.</i>	No text	<i>Difference in kind. No changes required.</i>	<i>Annex 2, SMGS, adapts provision TE25 for tank-wagons fitted with an automatic coupling device as well.</i>
6.8.4 TT8	Tanks approved for carriage of UN 1005 AMMONIA, ANHYDROUS and constructed of fine-grained steel with a yield strength of more than 400 MPa in accordance with the material standard, shall be subjected at each periodic test according to 6.8.2.4.2, to magnetic particle inspections to detect surface cracking. For the lower part of each shell at least 20 % of the length of each circumferential and longitudinal weld shall, together with all nozzle welds and any repair or ground areas, be inspected. Such magnetic particle inspections shall be carried	Tanks on which the proper shipping name required for the entry UN 1005 AMMONIA, ANHYDROUS is marked in accordance with 6.8.3.5.1 to 6.8.3.5.3 and constructed of fine-grained steel with a yield strength of more than 400 N/mm ² in accordance with the material standard, shall be subjected at each periodic test according to 6.8.2.4.2, to magnetic particle inspections to detect surface cracking. For the lower part of each shell at least 20% of the length of each circumferential and longitudinal weld shall, together with all nozzle welds and any	<i>Difference in kind.
