

## OTIF, an international actor at the European Rail Summit

The European Rail Summit held on 27 and 28 April 2016 was organised by the Railway Gazette Group and was hosted in Brussels by the Representation of the Free State of Bavaria to the EU.

This year, the theme of the summit was “Breaking Down Borders”.

The Secretary General of OTIF, Mr Davenne, was invited to present OTIF’s international role in terms of legal and technical interoperability, particularly beyond the borders of the European Union.

The summit provides an opportunity for the major European railway actors at both institutional and industrial level to discuss issues and against this background, OTIF’s presentation was particularly appreciated.
