

OTIF/RID/RC/2016/5
(ECE/TRANS/WP.15/AC.1/2016/5)

22. Dezember 2015

Original: Englisch

RID/ADR/ADN

Gemeinsame Tagung des RID-Fachausschusses und der Arbeitsgruppe für die Beförderung gefährlicher Güter
(Bern, 14. bis 18. März 2016)

Tagesordnungspunkt 3: Normen

Information über die laufenden Arbeiten des CEN

Antrag des Europäischen Komitees für Normung (CEN)

Einleitung

1. Gemäß der Vereinbarung über die Zusammenarbeit zwischen CEN/CENELEC und der Gemeinsamen Tagung (siehe OTIF/RID/RC/2011-A/Add.2 – ECE/TRANS/WP.15/AC.1/122/Add.2 in der durch OTIF/RID/RC/2013-A, Anlage III – ECE/TRANS/WP.15/AC.1/130, Anlage III geänderten Fassung) informiert der CEN-Berater die Gemeinsame Tagung über die laufenden Arbeiten des CEN, die zu Normen führen, auf die im RID/ADR/ADN verwiesen werden soll.
2. Diese Information wurde infolge der Schwierigkeiten der Europäischen Kommission bei der Finanzierung der Beratungsfunktion bei der letzten Tagung unterbrochen. Aus diesem Grund müssen während dieser Tagung zahlreiche Punkte von der Normen-Arbeitsgruppe geprüft und diskutiert werden.

Neues CEN-Umfrageverfahren – dreimonatige Umfrage mit gewichteter Abstimmung und optionaler formeller Abstimmung für CEN-eigene Projekte

3. In dem Bestreben, die Mechanismen und Verfahren für die Entwicklung von EN-Normen zu verbessern und infolge ähnlicher Änderungen bei den ISO-Verfahren hat das CEN in Reaktion auf die Mitteilung der Europäischen Kommission COM(2011)311, in der eine Verkürzung der

durchschnittlichen Entwicklungszeit für Normen um 50 % gefordert wurde, ein neues Umfrageverfahren angenommen (CEN/BT Beschluss 35/2014). Die Umsetzung des Verfahrens beginnt am 1. Januar 2015 und wird bereits seit 23. Oktober 2014 auf alle neuen Entwürfe angewendet.

4. Folgendes wird sich im Vergleich zu dem derzeitigen Verfahren ändern:

- Die Umfrage nimmt die Form einer gewichteten Abstimmung an.
- CEN-Mitglieder können abstimmen mit: JA, NEIN, ENTHALTUNG.

(In diesem Stadium muss auch über Zustimmung zu bzw. Ablehnung der Bewertungen des CEN-Beraters entschieden werden. Der CEN/TC begutachtet die Kommentare und lanciert ein einmonatiges Abstimmungsverfahren über die Notwendigkeit einer formellen Abstimmung.)

- Zustimmung = 71 % gewichtete Ja-Stimmen + einfache Mehrheit.
- Die Umfragedauer wird von 5 auf 3 Monate verkürzt.
- Je nach Ergebnis der Umfrage kann der CEN/TC entscheiden, die formelle Abstimmung ausfallen zu lassen und direkt zur Veröffentlichung zu schreiten.

5. Diese Änderungen betreffen die Zusammenarbeit zwischen der Gemeinsamen Tagung und dem CEN sowie die beschlossenen Kooperationsverfahren insbesondere in Bezug auf die zeitliche Planung von Kommentaren der Normen-Arbeitsgruppe der Gemeinsamen Tagung und die Zeitpläne des CEN. Telefonkonferenzen werden in dieser Hinsicht eine immer zentrale Rolle spielen. Sobald eine Stabilisierung der geänderten CEN-Verfahren eingetreten ist, wird CEN gegebenenfalls Änderungsvorschläge für das Kooperationsverfahren unterbreiten.

Vertragssituation des CEN-Beraters

6. Ende 2014 hat das CEN Herrn David Teasdale als Nachfolger für Herrn Karol Wieser eingestellt. Wie im Jahr 2014 hat die Europäische Kommission im Jahr 2015 sieben Monate finanziert, bevor sie dem CEN ein Budget zur Erfüllung dieser Aufgabe angeboten hat. Glücklicherweise hat CEN eine finanzielle Deckung des Budgets bis Ende Dezember 2017 erhalten.
7. Aus diesem Grund hat das CEN 3 Versandpakete vorbereitet: Die Versandpakete 1 und 3 umfassen Bewertungen der Entwürfe. Versandpaket 2 beinhaltet nur die Normen ohne Bewertungen. Im Januar 2016 könnte noch ein Versandpaket 4 mit Universalnormen folgen.

III. Neue Arbeitselemente

8. In Bezug auf das Arbeitsprogramm des CEN wird die Gemeinsame Tagung um Kenntnisnahme gebeten, dass entschieden wurde, folgende neue Arbeitselemente im Bereich der Beförderung gefährlicher Güter in das Arbeitsprogramm der CEN-Ausschüsse CEN/TC 23, 286 und 296 aufzunehmen. Für weitere CEN-Normen, auf die im RID/ADR/ADN bereits verwiesen wird, wurde eine Überarbeitung beschlossen. Nicht alle diese Normen werden als Kandidaten für eine Inbezugnahme im RID/ADR/ADN angesehen.
9. Die Mitglieder der Gemeinsamen Tagung werden gebeten, ihren Experten die Teilnahme am Aus- und Überarbeitungsverfahren dieser Arbeitselemente über die nationalen Normungsgremien zu empfehlen.

Tabelle neuer CEN-Arbeitselemente in Bezug auf Vorschriften des RID/ADR/ADN

verantwortliches Normungsgremium	Arbeitselement Nr.	Referenz	Titel
CEN/TC 23	00023190	EN ISO 10297:2014/prA1	Gasflaschen – Flaschenventile - Spezifikation und Baumusterprüfungen (ISO 10297:2014/DAM 1:2016))
CEN/TC 23	00023191	EN ISO 14246:2014/prA1	Gasflaschen – Flaschenventile – Herstellungsprüfungen und -überprüfungen (ISO 14246:2014/DAM 1:2016)
CEN/TC 23	00023192	prEN ISO 11363-1	Gasflaschen – 17E und 25E kegeliges Gewinde zur Verbindung von Ventilen mit Gasflaschen – Teil 1: Spezifikationen
CEN/TC 23	00023193	prEN ISO 11363-2	Gasflaschen – 17E und 25E kegeliges Gewinde zur Verbindung von Ventilen mit Gasflaschen – Teil 2: Prüfleihren
CEN/TC 23	00023194	prEN ISO 11117	Gasflaschen – Ventilschutzkappen und Ventilschutzkörbe – Auslegung, Bau und Prüfungen
CEN/TC 23	00023195	prEN ISO 17879	Gasflaschen – Selbstschließende Flaschenventile – Spezifikation und Baumusterprüfung
CEN/TC 286	00286167	EN 12493:2013+A1:2014	Flüssiggas-Geräte und Ausrüstungsteile – Geschweißte Druckbehälter aus Stahl für Straßentankwagen für Flüssiggas (LPG) – Auslegung und Herstellung
CEN/TC 286	00286168	prEN ISO 14245 rev	Gasflaschen – Spezifikation und Prüfung von Flaschenventilen für Flüssiggas (LPG) – Selbstschließend
CEN/TC 286	00286169	prEN ISO 15995 rev	Gasflaschen – Spezifikation und Prüfung von Flaschenventilen für Flüssiggas (LPG) – Handbetätigt
CEN/TC 286	00286170	EN 13175:2014/prA1	Flüssiggas-Geräte und Ausrüstungsteile – Spezifikation und Prüfung für Ventile und Fittinge an Druckbehältern für Flüssiggas (LPG)
CEN/TC 286	00286172	EN 13110:2012/prA1	Flüssiggas-Geräte und Ausrüstungsteile – Ortsbewegliche, wiederbefüllbare geschweißte Flaschen aus Aluminium für Flüssiggas (LPG) – Auslegung und Bau
CEN/TC 286	00286173	prEN 12807 rev	Flüssiggas-Geräte und Ausrüstungsteile – Ortsbewegliche, wiederbefüllbare, hartgelötzte Flaschen aus Stahl für Flüssiggas (LPG) – Konstruktion und Herstellung
CEN/TC 296	00296084	FprEN 14595 rev	Tanks für die Beförderung gefährlicher Güter – Bedienungsausrüstung von Tanks – Einrichtung für Über- und Unterdruckbelüftung
CEN/TC 296	00296088	EN 14564:2013/prA1	Tanks für die Beförderung gefährlicher Güter – Begriffe
CEN/TC 296	00296089	prEN 13094 rev	Tanks für die Beförderung gefährlicher Güter – Metalltanks mit einem Betriebsdruck von höchstens 0,5 bar – Auslegung und Bau

Neue und abgeänderte Verweise auf Normen

10. Seit der Tagung im März 2014 haben Normenentwürfe die Stufe der Prüfung und der formellen Abstimmung erreicht und wurden veröffentlicht. Sie wurden den Mitgliedern der Gemeinsamen Tagung auf der entsprechenden Website des CEN zur Konsultation zugänglich gemacht (Versand 1 bis 3).
11. Die Teilnehmer der Gemeinsamen Tagung wurden bereits gebeten, ihre Kommentare zu den im Versand 1 und im Versand 2 enthaltenen Dokumenten zu unterbreiten. Sie haben weiterhin **bis zum 30. Januar 2016** Zeit, ihre Kommentare zu den Dokumenten des Versands 3 an den CEN-Berater (david.teasdale@btinternet.com) zu richten. Für die Besprechung dieser Kommentare ist die Einrichtung von Ad-hoc-Webkonferenzen in der zweiten Hälfte Februar 2016 vorgesehen. Alle Kommentare werden in einem getrennten Dokument zusammengeführt und der Gemeinsamen Tagung zur Verfügung gestellt.
12. In der vertraglichen Vereinbarung mit CEN hat die Europäische Kommission die Tätigkeit des CEN-Beraters auf "qualitative Bewertungen" beschränkt. Dies stimmt mit Artikel 15 § 1b der Verordnung (EU) 1025/2012 überein:
 - "(1) Die Finanzierung durch die Union kann den europäischen Normungsorganisationen für folgende Normungstätigkeiten gewährt werden:
 - a) die Entwicklung und Überarbeitung von europäischen Normen und Dokumenten der europäischen Normung, wenn sie für die Unterstützung der Rechtsvorschriften und der politischen Maßnahmen der Union erforderlich sind;
 - b) **die Überprüfung von europäischen Normen und Dokumenten der europäischen Normung in Bezug auf ihre Qualität und Konformität mit den entsprechenden Rechtsvorschriften und politischen Maßnahmen der Union;**
- Unter diesen Umständen darf der CEN-Berater keine unterstützenden Tätigkeiten im Sinne von Artikel 15 § 1a mehr übernehmen. CEN bittet daher die Gemeinsame Tagung, einen Vorsitzenden für die Sitzungen der Normen-Arbeitsgruppe zu ernennen.
13. Das CEN-CENELEC Management Center (CCMC) wird selbstverständlich weiterhin sowohl den CEN-Berater als auch die Normen-Arbeitsgruppe der Gemeinsamen Tagung unterstützen.

Anlage**[nurEnglisch]****A. Standards at Stage 2: Submitted for Public Enquiry**

Dispatch 1

prEN 1439	LPG equipment and accessories - Procedure for checking transportable refillable LPG cylinders before, during and after filling	Where to refer in RID/ADR: Replace EN 1439:2008 except 3.5 and Annex G	Applicable sub-sections and paragraphs: P200
WI 00286165			

Assessment by CEN Consultant provided.

Comments from members of the Joint Meeting:

Country	Clause No.	Comment (justification for change)	Proposed change	Comment from CEN Consultant	Comment from WG Standards
DT	3.4 over-moulded cylinder	The Note 1 to the definition of an over-moulded cylinder states 'See also ADR definition' this implies that there is a definition in ADR for an over-moulded cylinder; currently in the 2015 version of ADR/RID there is no such definition.	This note should be removed.		
DT	3.5 casing	The definition in casing refers to 'composite cylinder' however there is no similar definition for a composite cylinder to which that definition refers. There are also criteria in Annex D concerning the rejection criteria for composite cylinders without defining exactly what a composite cylinder is.	Add a definition of a composite cylinder		
DT	3.13 periodic inspection	In the context of this type of equipment (pressure receptacle) the term pressure vessel is not normally used. There are detailed requirements for periodic inspection within ADR/RID which typically refer to the cylinder shell.	Replace the term pressure vessel with a more applicable term.		
DT		NOTE Rejection limits for physical, material and other defects on the cylinder shell are given in Annex A, Annex B, Annex C, Annex D and Annex G. Annex G provides rejection criteria for the over-moulded case not the actual cylinder shell itself.	The note should be modified to make it clear that for over moulded cylinders the rejection criteria is for the over moulded case and not the cylinder shell.		

DT		<p>Criteria in Table D 2 refers to the ‘protective jacket’ this term is not defined in the standard, however the photographs in the table seem to be of a cylinder with an over-moulded case (protective jacket?) which may have a liner however this is not clear.</p> <p>The terms are used throughout the standard without themselves being defined or part of a definition.</p>	Clarify/define the terms for a protective jacket and protected cylinder.		
DT		<p>There is no guidance given on the corrosive limits of the LPG that can be filled into the cylinders.</p>	<p>The standard should include a reference to the LPG that is filled into the cylinders being in compliance with the limitations on corrosiveness as specified in ISO 9162:1989.</p>		
CH		We agree with the comments of the CEN consultant in prEN 1439_DT and prEN 1439_DT (Add)			
CH		3.4 and Annexes G and H to be excluded (3.4 and Annex G already excluded for the Version EN 1439:2008)			
CH		"D1.1 NOTE 2 RID/ADR requires that these criteria are acceptable to the competent authority" There are no such requirements in RID/ADR.			
CH		Concerning corrosion: ISO 9162:1989 is mentioned in prEN 13952:2015 under 4.3 LPG Quality.	<p>It is therefore not necessary to mention it in EN 1439 (□ EN 13952 is mentioned as normative reverence and in 6. "Filling conditions"</p>		
UK	General	No objection to this standard being referenced subject to satisfactory resolution of the CEN Consultant’s comments.

Comments from members of the Joint Meeting:									
Country	Clause No.	Comment (justification for change)	Proposed change	Comment from CEN Consultant	Comment from WG Standards				
CH		No comment							
UK		These two standards will replace EN 1252-1 and EN 1252-2 both of which are normative references in the cryogenic tank design standards EN 13530 and EN 14398. These material property standards are invaluable to designers of cryogenic equipment and therefore, their role is as normative references in the tank design standards.	There is no need to reference these standards in RID/ADR; they support the cryogenic tank and pump design and construction standards						

Dispatch 1

Country	Clause No.	Comment (justification for change)	Proposed change	Comment from CEN Consultant	Comment from WG Standards				
DT	4.3 (Table 3)	4.3 Minimum T_R values are given in Table 3.... However the legend for Table 3. Table 3 — Minimum T_s values	The legend for Table 3 should be corrected to T_R .						
DT	4.3 (Table 6)	There are a number of instances in the Construction detail column typically for Part A or Part B where there is a thickness given i.e. e_1 or e_2 , which are different to the Part A or Part B in the Reference thickness column. For example the third example for a Branches and nozzles. Construction detail Part A ~ e_3 Reference thickness Part A ~ e_2 .	The Parts A or B and associated material thickness's should be reviewed for those in the Construction detail column and the Reference thickness column to ensure that they are aligned.						
UK		These two standards will replace EN 1252-1 and EN 1252-2 both of which are normative references in the cryogenic tank design standards EN 13530 and EN 14398. These material property standards are invaluable to designers of cryogenic equipment and therefore, their role is as normative references in the tank design standards.	There is no need to reference these standards in RID/ADR; they support the cryogenic tank and pump design and construction standards
